Component Styling (flex,css)
Mock-up / prototyping (RIA,Print)
Custom charting /Map component
Basic RPD development

Print media layout & design
Product Package Design
Logo / Brand Identity Design
Flash based Animations

Work Experience

I have around 6 years of experience in application development, Graphic design and Interaction Design. During this period I have had the opportunity of working on a wide variety of projects. My work involves delivering a solution right from the drawing board to requirement gathering, prototyping, task estimations, making of the first draft of POC (Proof of Concept), implementation and finally integration. Currently I am working as a Sr. BI Consultant using my acquired skills to improve the OBIEE stack.

KPI Partners

Designation: Sr. BI Consultant
www.kpipartners.com
Sept 2010 – till date
Bangalore, India

KPI partners are a leading BI firm in the US catering clients with unparalleled knowledge and experience in OBIEE implementation and configuration. KPI was also a big part of Oracle BI's product development team. My work at KPI involves working with different clients and providing BI solutions to them. I also make sure that an aesthetically good looking and usability wise user friendly Interface is delivered to the end user.

Clients: LeChateau, GE Capital, Apollo, GE marketing, GE Growthroom

Guavus Network System

Designation: Sr MTS I
www.guavus.com
Aug 2007 – Sept 2010
Gurgaon, India

Guavus is a Startup with a revolutionary set of analytics solutions that changes the way businesses make decisions. Our patented zero-latency, multi-silo data analytics platform continuously mines gushing streams of network, application, and customer data with a singular objective: deliver instantaneous, actionable insights to manage costs and maximize profitability. The product has a java back-end and flex on the front-end which delivers a powerful, elegant and rich UI. My work involves creating mock ups, writing custom components, design and development of UI components, requirement gathering, estimating time-line, new widget development and improvements in existing framework and Developing Proof of Concept (POC) for various data visualization and over all look-and-feel of the front end.

Widgets built : Traffic timeseries, Interactive network Topology, Dashboard, Heat map, traffic Matrix, Diagonal bar charts, Dynamic datagrid, Task wizard, Traffic gauge etc.

IBM Global Service
